The Progress on _____ of Building in St. Louis. Vast ... THE CITY'S GROW St. Louis Post - Dispatch (TH.: pg

The years so much building being done here as there is this summer. Gentlemen coming from the East and the older and more pepa-lens sections of the country express their at-ter astonishment at this city's growth. They say there is nothing like it to be seen in Concinnati, Philadelphia, Brooklyn, Gaithure, Boston, or even New York. It is a substantial and undeniable evidence that St. Louis is in a most prosperous condition. Feople do not build costly houses unless they are either mak-ing money or have a reasonable expectation of doing so. There is confidence in the future greatness of the city, and there is solid wealth here to make a practical showing of that confidence. No city in the country is in so good a condition to take ad-vantage of the new commercial life that is springing up everywhere. The vast amount of capital that is now being devoted to building purposes here does not come from other cities in the East or in Europe, but it comes from home, and the interest on it does not go to en-rich non-residents. The most encouraging characteristic of the building now being done here is its superior architectural quality. Ten here is its superior architectural quality. were show the ruling question was how many bricks or how much stone could be got for so many dollars. It mattered not how these ma-terials were put together, so that there was room and some conveniences. But now there a tendency at some ornament and artistic ste in both dwellings ane business houses. In order to a fair comprehension of build-ing in St. Louis the following table is given,

which shows the BUILDING FERMITS ISSUED FOR FOUR YEARS.

which shows the IIII.10156 FERMITS ISSUED FOR FOUR VEARS. Bits Frame Total Entiat's, Build's, Build's, Cost. IST......1,355 3599 1,667 \$2,257,772 IST......1,351 459 1,667 \$2,257,772 IST......1,351 454 1,855 3,129,755 IST.....1,351 454 1,855 3,129,755 IST.....1,374 198 1,972 5,652,935 It will be seen that the total number of per-mits issued in 1873 1,957, making number in 1878 1,957, making difference of about 300 in rof 1875. The difference in the amount a difference of about 1.500 in favor of is 75. The difference in the amount of money expended for building purposes in the setwo versis is far greater, being over 51, ore, 600 in favor of 1875. The difference in the amount of money spent is very much out of prejection to the difference in the number of buildings put up, and it appears that almost as many buildings could be put up in 1875 for \$2,579,7772 as could be in 1875 for \$2,579,4790. Of course, the character of the buildings had much to do with the cost, but there is also this consideration, which takes a prominent part. The cost of building material in 1875, was almost twice as great as it was in 1875, so that it is not too much to say that the city's growth in 1875 was almost as itrat as in 1875, when times were much better. Last year was the harl-pan year. Trade reached its lowest obb. It was a turning point in the transial history of the nation, such as its the difference in some the strence in the strence is a strence in the stre r of 1575. ing point in the mancial history of the nation, inc point in the initiality instally of the initiality and nothing felt the depression so much as real estate. With the coming of 1879 there was a new hope and a new life. The month of January had not gone before the re-sumption of specie payments was an accomplished and an admitted fact. The building interests were quick to each the new impulse, and as a consequence st. Louis is tull of derricks and half-made houses. An exmination of the record of building permits news that the number will be one-third be one-third he amount of that of last ows that the number will be one-thin eater than last year, and the amount oncy expended nearly double that of la ar. There is here given a het of buildings costing \$10,000 AND OVER, win process of erection. greater than last menev

being something different from anything tofore seen here. It will cost at least \$ The new store of Mr. Henry Lucas, corner of Fourth and Pine, will be con in about a month. It is constructed mi iron and stone, and will be a very sub-building.

WN. BARR AND CO.'S NEW STORE. This will be one of the splendid establishments in Americ of the n America Mive st This will be one of the most spleadid establishments in America. Is is to have a front of 140 feet on Olivo street and to extend along Sixth street the full block (230 feet) to Locust, upon which there will be a front 1130 feet. To give a better idea, it may be slated that the new structure will occu-py the whole of the tot on which skood the old Msflitt mansion, and also the size of what was formerly the Second Baptist Church. It will be a four-story building, but the leight between stories is so much greater than in ordinary building; that the cor-nice will tower above some structures which lay claim to five stories. The first story will be of iron and plate glass, giving a magnifeent front on streets of 500 feet. The upper stories will be of cut stone, the light Warrensburg and-stone having been selected. The first stort, is twenty-one feet in the clear between floor and ceiling; the socond eighteen leet and a half; the third, fireen and a half; and the fourth, fourteen and a half. In the interior there will be comars. Supporting the different stortes. These columns will give a space of stairways. In the waster for feet in width, one on Olive, one on Locust and two on Sixth. There will be two large passenger elevators and one for freight. There will be two sets of stairways. In the waster of the build-inger. The two lifts tories are now completed, and the spreet will be two institue the dill and the street will be two making it as hear fitories are now completed, and the grant retail dry goods firm will move into it early next year. It will cost \$250,000. THE NWS NOTHEN HOTEL. This, without doubt, will be the most valua-ble and notable of the buildings put up in St. Louis this year. It will cost about \$250,000. and will be a finer structure than could have been put up ten years ago for \$900,-0000. It will in a spearance be much like the oid southern, is the anne Walnut street wall is to be word. Is is to have a front of 140 feet on Olive

Louis this year. It will cost about \$350,000, and will be a finer structure than could have been put up ten years ago for \$300,-000. It will in appearance be much like the old Southern, as the same Walnut street wall is to be used. The Fifth street from will extend back fifty lect further towards kim than the old build ing and the same is true of the Fourth street front. The main entrance will be on Walnat street, though there are to be porticed en-trances on both Filth and Fourth street. From the Walnat street entrance through to kinet street, though there are to be porticed en-trances on both Filth and Fourth streets. From the Walnat street entrance through to kinet angles irom the Fourth to the Fifth street en-trance. The grand stairway will front south. The grand stairway of the old Southern the debris bif by the grant for juests, and the building will be store where will be and working are the debris bif by the grant for fuest, and the building will be for one source of the fourth of the store work will soon we let and the work will now engaged on the fuendations, part of which are in a sound candition. The contract for the store work will soon we let and the work will now progress more rapidly. It is not expected, how ver, to get the new hotely lead the will soon the form the Ist of October, 1880. The ST. LOUIS AKT MUSEUM. This is to cost \$75,000 and is the gift of Mr. Wayman Crow. It will stand on the northeast been much difficily in getting to solid earth, the excavations going into denth of thirty feet in some places. Its

ing to the south. The foundations are now about completed, though there has been much difficulty in getting to solid earth, the excavations going to the depth of thirty feet in some places. Its style of architecture will be soverely classic, and somewhat alter the threak style. The frent elevator is more simple, but chaste and elegant. The building will be down stor-ries high with a basement, and will be 130 feet in depth by 135 feet in width. There are to be four rooms devored to arr calleries, and a large anditorium in the rear for lecture are ty finished, and will be an art study within itself. There are to be no windows in the front of the building, the whole structure being highed from above. When inities it is will be one to the most beauting in the mont sto art in the new World.

ments to art in the new world. FOPE'S NEW THEVER. This will be one of the largest, best lighted, best ventilated and most elaborately inished theaters in the United States. The constructheaters in the United States. The construc-tion of it is one of the most remarkable pieces of work ever done in this city. People who have passed along the corner of Ninth and olive lately have been annazed at the ra-picary with which the work has been presented. Lost Nonday, a work ago, there was not a plant inside the walls of the build-ing, no thing but the bare earth a work lago, there have us up, the traine work of all the ther-mide and to day the laths are being put on the eclimation of the platters. The work has been wrought in so short a line the tas-maredous. When linkshet, the new theater wrough in so short a line there is marvelous. When linkshet, the new theater wrough in so short a line et al. marvelous. When linkshet, the new theater big a use a stage forly-six leef deep and seven ty feet wide. The "mats" will be twenty leet singe to the ceiling it is sixty feet, and there is a clear space of fourly-ive feet between the stage, now of the dressing rooms open from the stage, and are independent of the stage, none of them being in the dressing rooms will be well furnished, the onesused by the stars hav-ning hot and cold water and bah. There will be avide entrance to the stage from Ninth street. The front of the building of the theater will be independent of the stars hav-ning hot asd cold water and bah. There will be first start of the building of the theater will be independent of the stars hav-mil constarts corner, 27520 feet, and another west of the entrance 20x27 feet. The entrance will be 10 rooms for offices, supplied with all conveniences. The theater proper will be tion of it is one of the most remarkable pieces of work ever done in this city. People who 55. Ninth st. west of the part will be 25.27 feet will be 10 100ms | conveniences. Ti 70 feet between back of dre-entrain.
